

engageable in the plug receiving space of the receptacle contact, said plates being opposed and spaced from each other by a distance less than a distance between said receptacle walls, said plug walls and said plates extend in a plane parallel to said receptacle walls)

56. (New) The connectors according to claim 55 wherein said axis is generally non-
vertical.

57. (New) The connectors according to claim 55 wherein said axis is generally horizontal.

58. (New) The connectors according to claim 55 wherein said projecting section forming an unobstructed medial air gap wherein heat building up in said unobstructed medial gap may flow and leave said gap without obstruction.

REMARKS

In this application's parent, certain claims were cancelled to reduce the number of issues in the application and increase the probability that the application could be passed to immediate issue. These cancelled claims were to be reintroduced later in a continuing application and were not dedicated to the public.

This continuing application does not represent one of such reintroductions.

In this continuing application, applicant submits different claims of varying scope for examination. No new matter is introduced.

An early indication of allowable subject matter is requested.

Respectfully submitted,

Steven M. Reiss
